Carestream Dental Announces Longest Warranty in the Market for New Extraoral System

ATLANTA—Carestream Dental is proud to now offer an eight-year warranty for its new CS 8100 3D extraoral imaging system. The system, which was introduced in the spring of 2014, expands the diagnostic capabilities and streamlines daily workflows of dental practitioners.

This new warranty represents the longest available on the market in extraoral imaging. Benefits of the eight-year warranty include, but are not limited to, imaging software updates at no extra charge and repairs initiated within one day of a service request (whenever possible).

“From the very beginning, we designed the CS 8100 3D as a way to open the door to doctors looking for affordable and easy-to-use 3D system,” David Roudergues, director of U.S. dental equipment, Carestream Dental, said. “This warranty expands on that idea, giving doctors reassurance and confidence in both the reliability of the unit and their investment; not to mention, Carestream Dental’s commitment to its products and customers.”

Built on the award-winning, 2D panoramic technology available with the CS 8100 panoramic system, the CS 8100 3D offers 3D imaging and 3D model scanning all in one unit. The system’s 3D imaging technology captures images with 1:1 accuracy without distortion or overlap of anatomy. The system also facilitates lower dose examinations by acquiring images quickly with Flash Scan mode.

The CS 8100 3D includes motorized height adjustment options that accommodate patients of any size and those in wheelchairs. The system’s smart bite block, laser-free, vibration-free motion system, and integrated handgrips, simplify patient positioning and reduce the risk of needing retakes.

The system is also compact and fits in small spaces, offering practices flexible installation options. In fact, it has the smallest footprint on the market of any 3D imaging unit.

Additionally, images can be shared via USB flash drive, CD/DVD, email or lightweight screen capture. For easy case collaboration, both the 2D viewer and the entire 3D software can be shared with colleagues and referring dentists for free.

“A warranty like this has not been seen before on the marketplace,” Ed Shellard D.M.D., chief commercial officer, Carestream Dental. “For doctors looking for an affordable and reliable entry point to 3D imaging, now is definitely the time for practices that have been waiting to invest in 3D imaging to make the move.”

Practices also have the option of one- to five-year warranties to meet any budget.
