

Here are just a few examples of what past attendees have to say about our events:

3D Hands-On Workshops

“This course was great! The new information is very on point and Jordan’s grasp of the material is communicated very well and understandable. I left with many new tools.”

-William L. Krell, DDS

“This is the best 3D imaging course I have ever taken. The presenter was very knowledgeable and helpful. I would take future course in a heartbeat.”

-Julio C. De La Fuente, DDS

“The Carestream CBCT (Focused-Field) is immeasurably important in our daily practices of endodontics. The diagnostic capabilities and the patient education are far superior to any previous method of explanation. As endodontists, we use the CBCT for all surgical, retreatment, and resorption cases. There are also indications with calcifications, pulp stones, additional canals, etc. CBCT has changed the way we practice, making fewer exploratory procedures necessary. As a practice management tool, the patients accept our treatment plans at a much higher rate.”

-Dr. Denis "Chip" Simon III, DDS, MS

“I just attended the 3D Users Conference/Seminar in San Diego, presented by Jordan Reiss. First of all, Jordan is one of the most knowledgeable equipment specialists I’ve ever seen in my field. The seminar was not only informative, but open and dynamic. From the actual product standpoint, the main advantage Carestream Dental has is the customer support and ability to support their product, which helps me run my practice more efficiently. Thanks to all the support team!”

-Dr. German Trujillo, DDS

“Ryan and group were all enthusiastic and sincere about helping us use the full potential of 3D—I wish I had attended sooner! Ryan’s experience and energy combined made six hours breeze by in no time at all.”

-John Farrugia, DDS

“A must for everyone who already has, or is considering, a cone beam CT unit from Carestream Dental. Great information, hands-on approach and associated “how-to” videos a major plus; it’s like having a personal tutorial in your office.”

-Steve Litwin, DDS

“I’ve been using cone beam CT for several years, and I still learned a great deal at this course.”

- Fred Levin, DMD

“Ryan Roosekrans came to our office, along with our Rep Lorelee Smith, to teach a “quick overall review” on the 3D Imaging software for about 10 of our practice referrers. That hour-and-a-half course was a phenomenal extension to our introduction of the software’s capabilities.”

- Kerri Archer, RDA

“This is my second time taking this course with Ryan. I learn so much each time; his knowledge on the 3D Imaging software is amazing.”

-Peg Kurnik, EFDA

“Ryan is very knowledgeable about the 3D software. He communicates well and is a great presenter. His helpful hints make using the software easier.”

-Marc Lidkin, DMD

“Jordan just keeps on getting better and better every time I hear him. He simplifies all of the software Carestream Dental has so I can understand and use the principles. For anybody that wants to understand cone beam, he is a must see and hear.”

-Alan Hiura, DDS

“This was a great educational course about the benefits of CBCT, how to use it and how to utilize a lot of its features. A hands-on course is a great way to utilize it—much more than listening to lectures.”

-Emad Bassali, DDS

“Highly enjoyable and informative program that unlocks the secrets and tricks you need to extract the maximum amount of data from the CS 9000 series CBCT.”

-Manuel Bustamante, DDS

“The 3D Hands-On course was very helpful for those who have purchased the Carestream Dental CBCT or those considering purchasing one. The course gives you a really nice overview of the software and its features. Ryan did a great job of explaining some of the new components of the software. My CBCT has been very useful particularly with retreatments, both surgical and non-surgical, as well as with treatment of trauma cases.”

-Brian Lee, DMD

“Great course! I have had Carestream Dental’s CS 9000 for the past two years and I have gone through two trainings, but this course was the best training I have had. The speaker was knowledgeable, confident and generous of his time. If you want to use your software properly, this course is a must!”

-Ali Fatemi, DOD

“Very easy to follow and practical workshop. I am glad I attended.”

-Isam Estwami, DDS
