

Kodak OPMS

Practice Management Software

Kodak OPMS practice management software was developed and designed to help orthodontists and their staff perform daily tasks more efficiently and to help them deliver a better patient experience.

Guidance and support you can rely on.

Our staff is ready to provide the guidance and support you need every step of the way from implementation to training and beyond. We are ready to help you take full advantage of the tools offered in OPMS software, so you can focus on what's most important—your patients.

More options mean greater flexibility.

Kodak OPMS practice management software includes functional practice management features, plus add-on modules are available to expand the power of your system when you're ready.

OPMS software lets you...

- Utilize built-in reports or create custom reports using the datamaster feature.
- Keep track of important HIPAA-related documentation.
- Merge patient information with letters stored in Microsoft Word software so you can more easily generate letters to patients.
- Take advantage of Microsoft Windows system's multi-tasking capability as well as the benefits new computers can offer such as fast data processing and high-capacity data storage.

Add-on modules available with OPMS software.

Kodak OPMS charting module

Access the patient's entire treatment history and images. No more pulling patient charts or notes from the front desk. Our charting module can help you achieve a virtually chartless practice.

Kodak OPMS collections module

Are you effectively managing your accounts receivable? With the collections module, you can view past due accounts, enter promises of payment, and maintain a complete audit trail of your collection activities.

Kodak OPMS patient flow module

Do you know where your patients are? The patient flow module provides a continuous overview of patients as they flow through your office.

Kodak OPMS scheduling module

With the scheduling module, you won't have to flip through a schedule book. Each patient's appointment information and history can be accessed from any workstation in your office.
