Practice management software add-on modules

SoftDent practice management software is designed to be easy to use with the flexibility needed to meet the unique demands of dental practices today. We understand that every practice is different, so we offer add-on modules that allow you to customize and expand the power of your system when you're ready.

More options mean greater flexibility

Additional modules can help bring even greater efficiency to your practice, allowing you to focus on what really matters—providing quality patient care.

Support and guidance you can rely on

Just like our SoftDent software, our add-on modules are all backed by our expert service and support.

SoftDent charting module

With our charting module, you no longer have to search through charts to find the information you need to treat your patients.

SoftDent PEARL module

Access your SoftDent software files remotely using your smartphone. With the new PEARL module, information such as your patients' clinical profile, financial reports, appointment schedules, and digital radiographs is literally at your fingertips.

SoftDent voice activation module

Use our voice activation module to record perio findings automatically.

SoftDent image integration module

This module allows you to capture digital images and import those images directly into the patient's chart, quickly and easily, giving you a complete patient history with all the information you need in one convenient place.

SoftDent third party integration module

Use the third party integration module to access images and information captured with leading third-party software or imaging device.

SoftDent case presentation module

Our case presentation module allows you to create and present clear, professional looking treatment plans—making it easier for your patients to understand their treatment needs.

SoftDent fingerprint scanning module

Keep data safe with advanced fingerprint scanning technology. Team members can quickly log in and out of the practice management and imaging software with nothing more than their finger.

SoftDent eForms module

Introducing eForms: Convenient, Paperless, Cost-Effective. A better way to complete the patient registration process. With eForms: Patients complete their registration BEFORE they get to your office.

- Don't waste time re-entering patient information
- Use less paper
- Patients signature are captured electronically

Call 800.944.6365 to take advantage of the practice enhancing tools available with SoftDent software.
