

Seamless Integration with KODAK Digital Imaging Systems

For WINDENT Platinum,
WINDENT SQL & WINDENT OMS

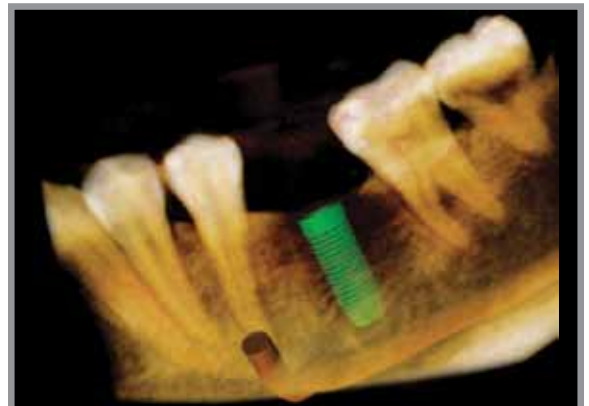

Your Windent practice management software is even more powerful than you may have thought, thanks to its seamless integration with Kodak dental imaging software. You can now quickly view detailed clinical images from the full selection of Kodak digital imaging systems, increasing your diagnostic capabilities and saving valuable time.

Rapid Image Acquisition with No Bridging Software Necessary

Thanks to full compatibility between Kodak dental imaging software and Windent practice management software, there's no need for separate bridging software. Enjoy rapid digital image acquisition and reconstruction for huge efficiency gains. Harness the advantages of digital imaging such as paperless storage and simplified transmission for collaboration. Kodak digital imaging systems are designed with a short learning curve and patient-friendly positioning. Plus, if you ever do need to re-capture an image, you'll know much faster than with film.

Focused-field volume from the Kodak 9000 3D system

Imaging Solutions for Any Practice

Award-winning Kodak digital imaging systems provide a diverse set of imaging solutions to fit the particular needs of any practice, including cross-disciplinary collaboration.

- Periapical & intraoral: Kodak RVG 6100 digital radiography system and Kodak 1500 intraoral camera
- Panoramic: Kodak 9000 extraoral imaging system and Kodak 8000 digital panoramic system
- Focused-field 3D + panoramic: Kodak 9000 3D extraoral imaging system (also available with extended-field volume stitching program)
- Medium-field 3D: Kodak 9500 cone beam 3D system for dual arch applications
- Large-field 3D: Kodak 9500 cone beam 3D system with large-field and medium-field of view options

Versatile Kodak dental imaging software allows volumes to be saved to a disk and transferred with a fully-functional 3D viewing module so that other oral health professionals may manipulate the images to focus on specific regions of interest.
