Carestream Dental Announces Enhanced Functionality for EMR-Elite for WinOMS CS Practice Management Software at AAOMS Annual Meeting

All-New EMR Notes Streamlines Clinical Note-Taking and Workflow

ATLANTA – Carestream Dental, the exclusive manufacturer of KODAK Dental Systems, today introduced an updated version of the EMR-Elite solution for WinOMS CS Practice Management Software at the American Association of Oral and Maxillofacial Surgeons (AAOMS) Annual Meeting, being held through Sept. 17 at the Pennsylvania Convention Center in Philadelphia.

The latest version of EMR-Elite, a bundle of the best add-on modules for WinOMS CS Software, streamlines the way clinicians capture notes to support a chartless practice.

“We are continually working to develop and improve solutions designed to maximize the latest technologies and to help keep practices running smoothly,” said Matt Ackerman, U.S. oral surgery product line manager, Carestream Dental LLC. “The EMR-Elite solution with all-new EMR Notes includes additional capabilities that support a paperless practice by simplifying note-taking and workflow.”

The redesign of EMR-Elite’s operative, SOAP and progress notes offers users the flexibility to accommodate differences between patients’ cases and doctors’ note-taking preferences. With a built-in word processor, EMR Notes eliminates the need to create and import separate Microsoft Word documents.

Other time-saving enhancements include a new tab layout that makes it easier to find needed items, improved navigation for faster searches and the ability to “digitally flip” through a patient’s chart. A full library of customizable templates is also included within the software to help save time when taking notes or entering orders. Available templates address common procedures and case documentation, such as third molar extractions, implant placement, pathology reports and more. Text “snippets” draw on a database of frequently used phrases and are template specific, facilitating speedy note-taking.

“New features with EMR-Elite relieve the burden of rekeying information,” Ackerman said. “For example, when a doctor selects a template the pertinent patient information is automatically populated. Best of all, as the solution is used it becomes more robust and customized for the specific needs of practices. Templates and common notes can even be modified and saved for future use.”

The versatile EMR-Elite solution also includes the Point-of-Care module and the anesthesia module. The Point-of-Care module can be used on a tablet PC anywhere there is wireless access in the office and is ideal for chairside presentations with

patients. The anesthesia module enables records to be attached directly to patient charts for easy access and safe storage. When saving records with the anesthesia module, an unalterable digital timestamp is applied to the file, ultimately keeping practices in compliance with medical-legal requirements.

EMR-Elite makes it easier to share and collaborate with colleagues, helping practices manage referrals. Scans and notes can be shared via a USB drive or CD to facilitate collaboration and improve overall patient outcomes. In addition, a new search tool allows users to quickly locate any procedure, note or consult.

Carestream Dental invites all AAOMS attendees to visit booth #930 to experience the new ease and convenience offered by the latest version of EMR-Elite. For more information on the EMR-Elite solution or to request a demonstration, call (800) 944-6365 or visit www.carestreamdental.com.

About Carestream Dental LLC

Carestream Dental LLC, the exclusive manufacturer of KODAK Dental Systems, provides industry-leading imaging, software and practice management solutions for dental and oral health professionals. With more than 100 years of industry experience, Carestream Dental products are used by seven out of 10 practitioners globally and deliver more precise diagnoses, improved workflows and superior patient care.
