Carestream Dental Introduces KODAK RVG 6500 System at Chicago Dental Society Midwinter Meeting

*World's First Intelligent Positioning System Reduces Retakes;
Wi-Fi Design Enables the User to Move Freely About Practice*

ATLANTA – Carestream Dental, the exclusive manufacturer of KODAK Dental Systems, today introduced the KODAK RVG 6500 System at the 146th annual Chicago Dental Society Midwinter Meeting, being held through Saturday, Feb. 26, at Chicago's McCormick Place.

The new RVG 6500 System represents another industry first from the company that invented digital radiography. The groundbreaking Intelligent Positioning System (IPS) ensures accurate sensor placement during patient examinations by visually aiding alignment of the sensor with an intuitive, real-time display. Once the generator's X-ray beam is correctly aligned with the sensor, the IPS automatically notifies the user.

"The KODAK RVG 6500 System provides a higher level of patient care with its Intelligent Positioning System, which ultimately helps practitioners avoid common positioning mistakes and reduces the risk of retakes that can lead to greater patient radiation exposure," said Patrik Eriksson, president and CEO, Carestream Dental LLC.

The RVG 6500 System is also Wi-Fi, enabling the user to move freely about his or her practice without cumbersome cords. The design allows the user to adapt the system to a variety of practice configurations, accommodating both multi-sensor and multi-computer environments. This gives members of the care team unprecedented imaging flexibility, whether they work in a single- or a multi-chair practice.

Delivering the highest resolution of any intraoral sensor in the industry (> 20 line pairs/mm), the RVG 6500 Sensor offers the same, best-in-class image quality as wired KODAK RVG 6100 Sensors. The RVG 6500 System's Wi-Fi capability enables the user to view and share acquired images on an Apple iPad[®], fostering better patient communication.

"The RVG 6500 System's ability to share images on an iPad and let patients hold them up close is revolutionizing communication, helping practitioners educate their patients and ultimately make decisions about their treatment plans and overall oral health," said Eriksson.

The annual Chicago Dental Society Midwinter Meeting offers one of the largest dental

exhibitions in the United States, with nearly 600 manufacturers, dealers, suppliers and labs participating every year. The 2011 event is under way at the McCormick Place West Building in Exhibit Hall F on Level 3.

Carestream Dental invites all Chicago Midwinter Meeting attendees to visit their booth, number 3216, to get a hands-on demonstration of the RVG 6500 System during the show.

For more information on the KODAK RVG 6500 System or to request a product demonstration, call (800) 944-6365 or visit www.carestreamdental.com.

About Carestream Dental

On Sept. 1, 2010, Carestream Health's dental systems group, the exclusive manufacturer of KODAK Dental Systems, announced the harmonization of its worldwide dental divisions under the Carestream Dental name. Carestream Dental offers imaging and practice management systems that enable dental and oral health professionals to easily capture and share images, streamline their workflow and enhance patient care. For more information, or to contact a Carestream Dental representative, call (800) 944-6365 or visit www.carestreamdental.com.

About Carestream Health, Inc.

Carestream Health, Inc., is a worldwide provider of dental and medical imaging systems and healthcare IT solutions as well as molecular imaging systems for the life science research and drug discovery/development market segments, and X-ray film and digital X-ray products for the non-destructive testing market. For more information about the company's broad portfolio of products, solutions and services, please contact a Carestream Health representative at (888) 777-2072 or visit www.carestreamhealth.com.
