# CS 3600 Intraoral Scanner Certified for Use with OraMetrix® and suresmile® Orthodontic Technology

**ATLANTA**—Carestream Dental is pleased to announce that, due to the high degree of accuracy of the CS 3600 intraoral scanner, it has been certified by OraMetrix Inc. for use with its suresmile® technology.

The integration of scans captured by the CS 3600 with suresmile software opens up new digital workflow options to orthodontists for case planning, combining 3D diagnostic imaging with computerized treatment planning and robotic archwire customization. Orthodontists can plan tooth movement on digital models and customize prescriptive archwires for more precise and efficient treatment.

"I am excited about the certification of the CS 3600 for use with suresmile and other OraMetrix digital solutions," Matthew Hendrickson, orthodontic director, Carestream Dental, said. "Certification against strict OraMetrix accuracy requirements validates the incredible accuracy and versatility of the scanner. The speed and the ease of use of the CS 3600 make it ideal for use in orthodontic practice and we are proud to be a certified OraMetrix partner."

"Certification of the CS 3600 intraoral scanner gives suresmile users a new scanning option," Charles Abraham, CEO, OraMetrix, Inc., said. "Doctors can be confident in images of consistently high quality."

The high-speed, continuous scanning capabilities of the CS 3600 allow users to acquire scans quickly and easily while scanning in a smooth, uninterrupted manner. The scanner's intelligent scanning algorithms make it easy to go back and fill in any missing information in the data set. Three rounded, autoclavable interchangeable tips—normal, side-oriented and posterior—aid when scanning in hard-to-reach areas. Plus, full HD 3D color digital impressions provide more vivid color and texture for better communication with labs, patients and referrals.

Carestream Dental's CS 9300C Select and CS 9300C systems received the coveted suresmile certification from OraMetrix in April 2013 and October 2011, respectively. Carestream Dental is the only company to have both a CBCT unit and intraoral scanner certified by suresmile.

For more information about the CS 3600 or any other orthodontic imaging solution from Carestream Dental, please call 800.944.6365 or visit [carestreamdental.com](http://carestreamdental.com). For more information about suresmile, go to [suresmile.com](http://suresmile.com).

## About suresmile

The suresmile system is a digital technology that equips orthodontists with a powerful diagnostic, treatment and monitoring tool to deliver the most precise, customized orthodontic care available. suresmile has been shown to reduce treatment time by an average 30 percent, based on a February 2011 comparison of more than 40,000 patients. Since 2004, suresmile has been used on over 150,000 patients by orthodontists in the United States, Europe, Australia, Japan and Canada. For more information, go to [www.suresmile.com](http://www.suresmile.com).

### About Carestream Dental

Carestream Dental provides industry-leading dental digital product lines and services, including imaging equipment, CAD/CAM systems, software and practice management solutions, for dental and oral health professionals. With more than 100 years of industry experience, Carestream Dental technology captures two billion images annually and delivers more precise diagnoses, improved workflows and superior patient care.
