

CS SOFTDENT v18.0 UPGRADE IS NOW AVAILABLE WITH EPAYMENTS SECURE

Carestream Dental is pleased to announce its latest version of SoftDent—v18.0. This major upgrade features significant improvements to make your practice management experience more efficient.

SoftDent v18.0 integrates with ePayments Secure,* which enables you to accept the methods of payment that your patients prefer using advanced security technology.

Improvements to printing, accessing and capturing patient information streamline communication among staff and provide your office with even more functionality so you can wrap up your workday on time.

FEATURES

BENEFITS

1 ePayments Secure

ePayments Secure enables your practice to accept the latest payment methods such as chip, debit cards, credit cards, Apple Pay, Google Pay and Samsung Pay.

Enjoy the latest payment options while increasing data security.

2 Enable payments via website

Via our processing partner, TSYS, your practice can enable patients to pay online when enrolled in ePayments Secure

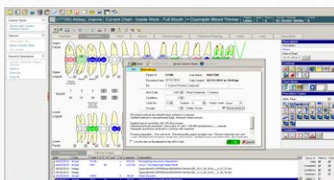

Allows patients to make payments via your website from anywhere at any time.

3 Automatically post payments to ledger

ePayments Secure automatically posts to the patient ledger and settles nightly.

Eliminates time-consuming errors and remembering to balance so you can leave on time.

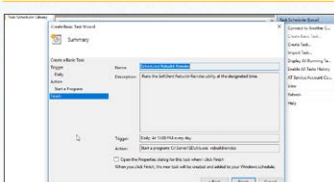

4 Reviewed by Dr. checkbox

Track when clinical notes are reviewed using the "Reviewed by Dr" feature.

Provides instant communication for the staff and confirms which notes have not yet been reviewed by the doctor.

Once checked, a "Yes" will be displayed in the Work Performed and Patient Clinical Notes List window.

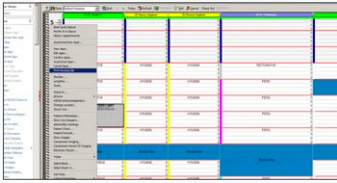

You have flexibility and control to set access permission for select individuals via the System Security Settings

5 Schedule utilities to run automatically

For on-premise users, SoftDent support can now schedule your three core utilities (Rebuild/Re-index, Find Largest ID and Find/Repair Corrupt) to run automatically when convenient for your practice.

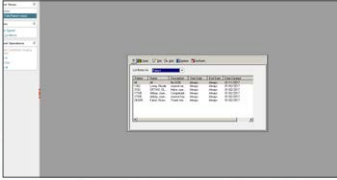

Enables you to automatically run utilities at a time that is most convenient for your practice, eliminating the need to contact support every time.

6 New options for printing the routing slip

Print the Routing Slip from 3 locations: Options Window in Express Bar, top of the appointment card or right clicking on the appointment.

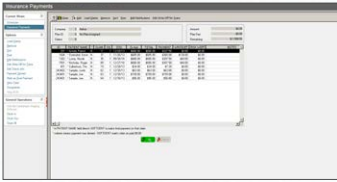

Allows you to print the routing slip from the location that is most convenient for you.

7 Additional columns added to Team Talk Notes

Name and Date Created fields have been added to the Team Talk Notes

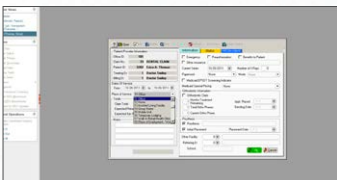

Provides you with additional details about the patient and date the note was created

8 Expansion of Bulk Insurance Payment window

The Bulk Insurance Payment window has been expanded and can now display a longer list of transactions than the previous version.

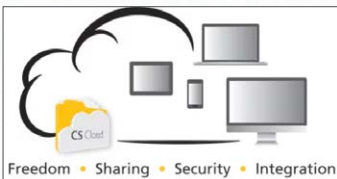

Enables you to view more transactions at a glance.

9 New Place of Service options

Nineteen new options have been added to Place of Service such as schools, assisted living and urgent care facilities

Supports practitioners who need to provide patient care outside of the dental practice

10 CS SoftDent Cloud: Be one of the first to receive updates

SoftDent version 18.0 can be accessed via the cloud, offering your practice instant updates and the same familiar look, functionality and features that you know.

Allows you to automatically receive updates as soon as they are released, with no need to install the software.

With over 10,000 cloud users and over 10 million images stored, Carestream Dental is a leading provider of cloud practice management software solutions.

Enables access to SoftDent software from anywhere, making it the ideal choice for growing practice seeking a scalable solution

SoftDent Cloud users will receive v18 update automatically. On-premise users can accelerate their upgrade on DVDs by contacting Carestream Dental at **800.944.6365** Option 2.
