FY 2023 ICD-10 Codes Installation Guide

Installing FY2023 ICD-10 Code Updates to the WinOMS Software

This job aid contains instructions for updating the WinOMS software with the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10 CM) diagnosis code set additions for Fiscal Year 2023, using the Update Utility.

Note: The updated code set is included in WinOMS, version 10.0.4 or higher. Once you install a new version of the software, the utility is not needed.

To use this utility, you must:

- Be using WinOMS, version 8.11 or higher.
- Download and run this utility on a server computer.
- Have Administrator security permissions to install this update.

To download and run the ICD-10 Update Utility:

1. Close WinOMS on all machines.
2. On the server computer, go to https://www.carestreamdental.com/en-us/training-resources/code-updates/ICD-10/.
3. Click the download link for WinOMS Users. The **icd10.zip** file is downloaded automatically to the default download location, or you are prompted to save it, depending on your browser.
4. Navigate to the folder and unzip the file.
5. Right-click the **icd10updateinstall.exe** file and select **Run as administrator**. The **ICD-10 Code Update Utility Setup Wizard** is displayed.
6. Click **Next**. The **Select Destination Location** window is displayed. The server location should be populated, but if not, click **Browse** and select **c:\WinOMSCS**.
7. Click **Next**. The **Ready to Install** window is displayed.
8. Click **Install**. The utility is installed, and you are prompted for login credentials.
9. Enter your WinOMS user ID and password, and then click **OK**. The **ICD-10 Code Update Utility FY2023** utility begins processing the code changes.

When the status reads **Process Complete**, ICD-10 codes have been updated.

Note: Data will vary depending on ICD-10 Codes that were added to the DX Table.

To confirm ICD-10 utility has executed the update:
Navigate to **c:\winomscs** and open the file: **ICD10utility.log**.

Note: In the software, use the Lookup feature to add new codes you need. Select **Tables > Diagnosis > Codes > New**. Under **Actions**, enter the code you want (i.e., **R97**) and click **Lookup**. Select a **Category** and click **Save**. The code is added to the list.

If you have issues during the installation, contact a Carestream Dental Support representative at https://www.carestreamdental.com/en-us/training-resources/Support/.
