

Windent Software

Installing ICD-10 Codes

This job aid contains instructions for using the CDT 2015 utility to load a subset of the ICD-10 codes in Windent, version 6.5.9 or higher, software.

Note: Older versions of Windent do not contain the update utility or do not contain the changes necessary to import the ICD-10 codes. To upgrade to the current version, contact support.

Retrieving the Utility Login Credentials

You must have a valid login to the Carestream Customer Portal to retrieve the credentials.

To retrieve the credentials:

- 1 Go to www.carestreamdental.com, and log in to the Customer Portal.
- 2 Select the link for **CDT Updates**. A list of utilities is displayed by product.
- 3 Select **Windent CDT Code Utility**, and the following information is displayed. Use it to run the utility.
 - FTP Path
 - User
 - Pass

Updating the ICD-10 Code Set Update

To run the update utility:

- 1 In the Windent software, select **Internet > Windent Update**. A message is displayed.
- 2 Make sure Windent is closed on all machines, and click **OK**.
- 3 In the **Windent Update** window, click **Settings**.
- 4 Enter the information from the Customer Portal, and click **Save**.
- 5 In the **Windent Update** window, select **ICD Codes**, and click **Update**. When the update is complete, a message is displayed.
- 6 Click **OK**.

If you have issues during the CDT code set installation, contact a Carestream Dental Support representative.
